

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

**Titles of informal papers and notes presented before the  
Botanical Club, A. A. A. S., Brooklyn meeting, 1894.**

C. E. BESSEY: *The germination of the macrospores of Marsilia vestita.*

E. F. SMITH: *Tannin as a mordant for staining cell-membranes.*

F. C. NEWCOMBE: *Tannin as a mordant for staining protoplasmic structures.*

W. J. BEAL: *The use of measurements in the identification of grasses.*

L. R. JONES: *The decrease of oat-smut in Vermont.*

B. T. GALLOWAY, E. F. SMITH and G. H. HICKS: *Formaline as a preserving fluid.*

N. L. BRITTON: *The check-list of plants of the northeastern states.*

E. F. SMITH: *The bacterial disease of cucumbers with an exhibit of photomicrographs.*

C. E. BESSEY: *Extreme decapitalization.*

L. R. JONES: *A Haematococcus for class-demonstration of motile gametes.*

E. J. DURAND: *Sporangial trichomes on certain ferns.*

ARTHUR HOLLICK: *The significance of stipules from the standpoint of paleobotany.*

C. R. BARNES: *The finding of a considerable quantity of Eustichia Norvegica in Wisconsin, in fruiting stages.*

J. J. DAVIS: *Gonidial chains of Entyloma flærkeæ.*

B. D. HALSTED: *Solandi printing of variegated leaves.*

C. E. BESSEY: *A better pronunciation of botanical terms.*

B. D. HALSTED: *The peach-spotting fungus as a leaf parasite.*

E. J. DURAND: *Development of Olpidium sp., one of the Chytridiaceæ.*

B. D. HALSTED: *A peculiar discoloration of the Paeonia leaf.*

E. F. SMITH: *A simple method of making pure cultures of fungi.*

C. E. BESSEY and ROSCOE POUND: *The work of the Botanical Seminar of Nebraska.*

M. B. WAITE: *The killing of young shoots of the pear by excessive transpiration.*

M. B. WAITE: *Staining the flagella of bacteria.*
